

Who are we?

Operating since 1988, Cod Beck Blenders is renowned for providing a wide range of toll and contract manufacturing services of both intermediate and finished products.

Working with a blue chip client base within the pharmaceutical, agricultural, agrochemical, horticultural and fine chemical industries, we are a trusted partner providing an integrated service for 'own label' products.

Our purpose-built eight acre site in North Yorkshire, close to the A1 and A19, includes six dedicated units, enabling us to offer a full range of services including blending, packing and specialised chemical drying of powders and liquids.

Safe product stewardship

With accreditations and licences from the leading industry bodies, consistently delivering contract manufacturing excellence is at the heart of everything we do.

As well as offering a high level of operational skills and sound technical expertise, we have rigorous procedures in place to deliver an effective quality system and ensure safe product stewardship. We are also committed to providing a customer-focussed approach, co-operating on joint innovation projects and adapting our services to meet customers' specific requirements.

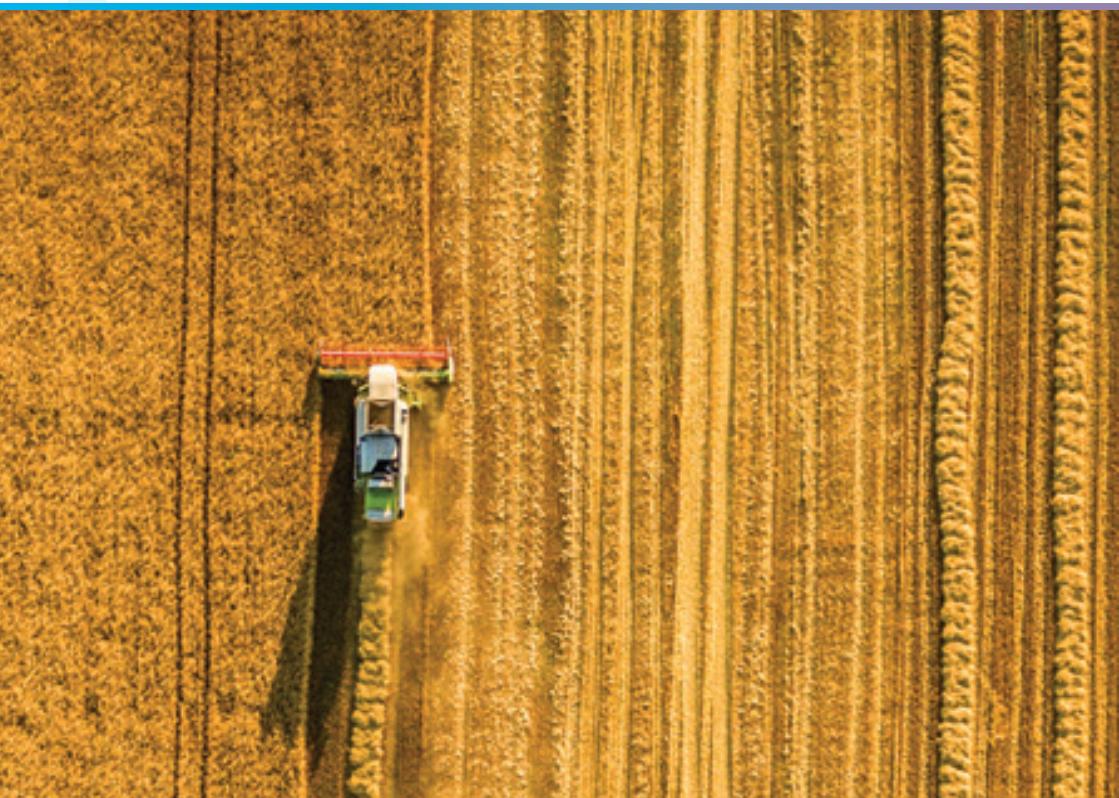

Whether you want to scale up new products, ease pressure during periods of high demand, or outsource non-core processing activities, we can help. By partnering with us, you will have access to a modern plant with complete regulatory approval, removing the need for capital investment.

Food

With our dedicated BRC facility, we are able to serve the food ingredients sector.

From powder blending and packing to food ingredient milling and food ingredient drying, we can provide whatever our clients' needs and we work with some of the best known brands.

Our plant is BRC accredited with Kosher and Halal certifications and we also offer a BRC accredited dedicated warehouse.

Veterinary Medicines

As holders of a Veterinary Medicines Manufacturing License accredited by the Veterinary Medicines Directorate, we are able to produce a range of animal health products.

We can produce a wide range of pack sizes from 50g to 25kg and have recently invested in an automated pouch packing line.

We have also worked closely with a manufacturing partner to install and operate their product serialization manufacturing facility.

VMD

Feed Additives

We manufacture a wide range of animal feed additives including producing feed additives for poultry, pigs and ruminants with products that serve as digestive aids, preservatives or help palatability.

We are both FEMAS accredited and NOPS (Naturally Occurring Prohibited Substances), allowing us to serve the race horse industry.

Specialty Chemicals

We work across a huge spectrum of products and industries including agro-chemicals, building coatings, de-icers, disinfectants and more.

Offering a range of powder blending and packing services, we can pack from 50g up to 50kg in pouches, bags, foil packs, tubs or pails. We also provide liquid blending and packing in containers from 50ml to 1000l. In addition, we have facilities for vacuum drying and for milling, grinding and micronizing, plus sieving.

Serving long-standing manufacturing partners as well as ad-hoc new customers with more occasional needs, all our clients can rest assured that we are accredited to ISO 9001:2015 across our entire site.
