

**IFC Inflow**  
Safe Vehicle Access

# Introduction

**At IFC our mission is to create safer working spaces.**

**That's why we offer a complete range of safe access stairs.**

Our range has been carefully designed to provide safe working at height solutions wherever you need one. From our lightweight and mobile FlexiStep - with options for three to seven steps - to our mounted and pneumatic assisted FlowStep range, we have the vehicle access solution for you.

For over 35 years IFC Inflow has designed and manufactured products to improve the safety of operatives. What started as a liquid loading company in the oil industry, quickly evolved to offer our customers a solution to all their loading needs. This saw us grow into a specialist business, bringing expertly designed products that focussed on eliminating working from height and manual handling risks to the oil industry. As we continue to grow we intend to bring our core values to new markets, building safer working spaces with fit-for-purpose products.

# FlexiStep

**Our FlexiStep range is designed to meet the heights required to access a variety of vehicles, including but not limited to:**

- Flatbed trucks
- Curtain side trailers
- Light aircraft
- Railway carriages

FlexiStep provides you with a solution to all your workplace access needs. The FlexiStep range is lightweight and fully mobile, with a robust brake and hard-wearing wheels.

PRODUCT CODE	DESCRIPTION	PRICE
VAS-3	3 step – 508mm wide step, 730mm high	£389.95
VAS-3W	3 step – 730mm wide step, 730mm high	£405.71
VAS-4	4 step – 508mm wide step, 965mm high	£445.24
VAS-4W	4 step – 730mm wide step, 965mm high	£466.15
VAS-5	5 step, narrow, 1206mm high	£502.20
VAS-5W	5 step, wide, 1206mm high	£527.75
VAS-6	6 step, narrow, 1448mm high	£558.00
VAS-6W	6 step, wide, 1448mm high	£588.25
VAS-7W	7 step, wide, 1727mm high	£705.65
<b>OPTIONS</b>

VAS-G2	Outward opening gate at bottom of platform	£88.35

# FlexiPro

The FlexiPro offers a flexible solution for unconventional situations. The adjustable mobile platform provides an excellent alternative to ladders or scaffold towers.

Suited to operations such as vehicle servicing, repairs and maintenance, the FlexiPro offers a safer platform alternative to traditional solutions.

This mobile platform is easy to use and can be operated by one person. It is height adjustable via a hand winch and is made from robust aluminium alloy with a steel base. It comes with a two handrail step ladder and a three-rail safety cage around the working platform.

PRODUCT CODE	DESCRIPTION	PRICE
R3298	Adjustable mobile working platform up to 1.9m 600mm wide	£POA
	Adjustable mobile working platform up to 1.9m 800mm wide	£POA

# TopStep & LowStep

As our first mobile access stairs, the TopStep and LowStep range was specially designed to meet the tough demands of tanker access in remote areas.

Due to the adaptable nature of the designs, the TopStep and LowStep can be used to access a whole host of vehicles - not just tanks.

## TopStep

With its integrated fall prevention cage, TopStep grants access to the top of any vehicle, anywhere. The system was specially designed to meet the requirements of sites where fixed access points aren't a viable option, while still providing the highest level of safety for the operator.

## LowStep

LowStep access ladders are designed to offer safe and easy access onto the back of vehicles. It has an integral three-rail safety cage that provides a safe working area while preventing falls from height. LowStep gives you the benefits of both access steps and fall prevention cages.

PRODUCT CODE	DESCRIPTION	PRICE
TT01	TopStep mobile tanker access ladder – top access – 01 cage	£7,580.00
TT02	TopStep mobile tanker access ladder – top access – 02 cage	£7,957.00
TT03	TopStep mobile tanker access ladder – top access – 03 cage	£8,450.00
LT01-ASSY	LowStep mobile tanker access ladder – bottom access	£3,999.00

# FlowStep Folding Stairs

Our FlowStep is a fit-for-purpose mounted step range. Intended to be mounted onto fixed structures such as gantries. They provide a safe method of accessing and working on the tops of vehicles.

They are designed to be height adjustable, allowing access to various vehicle heights and are ideal for vehicle top operations such as the opening of a manway hatch on road tankers and inspection of vehicle top-mounted equipment.

Our FlowStep range is available in a variety of sizes and specifications, including various reach and width options. The stairs are self-levelling, ensuring the steps are always in the horizontal position for the safest possible operation. The fall prevention safety cages provide a safe working area on top of a vehicle without the need for safety harnesses or other fall protection equipment.

PRODUCT CODE	DESCRIPTION	PRICE
FS-3STEP	3 step folding stair	£2,492.00
FS-4STEP	4 step folding stair	£2,791.00
FS-5STEP	5 step folding stair	£2,997.00
<b>OPTIONS</b>		
FS-SC1414	1.4m x 1.4m cage	£720.00
FS-SC1428	1.4m x 2.8m cage	£787.50

## OUR OTHER PRODUCTS

### Electronic Bottom Loading Skids

- Fully integrated fuel control systems – web-based monitoring and reporting
- Earth grounding verification for safe operation
- Rugged and fully weatherproofed for long service life
- Driver Identification systems for self-service options
- Bespoke design for every single customer

### Chemical Loading Arms

- Designed to handle any “non-petroleum” product
- Ideal for loading liquids including chemicals, solvents, paints, and even foodstuffs
- Can be used for open, semi-open or closed fill applications
- Options include: vapour recovery, high level/overflow sensing, electric tracing, thermal cladding, and PTFE or PFA lined arms.
