KLINGER Integrity Services brings to the market our trusted design, manufacture and supply of sealing products together with industry leading flange management tools and on-site services in one package.

The success of The KLINGER Integrity Service team is built on a global model with over 60 years' on-site experience in gasketing, bolting, machining, and testing services.

A complete engineered solution offering a leak free guarantee and right first time start up.

- Right first time Philosophy, reducing risk whilst increasing safety and efficiency
- Management of critical path items from design through to installation and testing
- Integrated engineering solutions designed to eliminate unplanned downtime
- Demonstrated cost reductions through ownership of the integrity process
- Reduced fugitive emissions
- Innovative solutions for problematic applications
- Guaranteed leak free sealing
