Protect Your People & Your Worksite

A safe working environment is always our first priority and we know how important it is to have a clean, well-organized and safe worksite. At Rain for Rent we are dedicated to creating products to help prevent slips, trips, and falls — we have the products you need for a SAFE worksite:

PipeStax® can prevent pipe from rolling and stabilises it during temporary job applications.

Cover pipes, hoses, or cable running in areas around your worksite. Safe walkways over potential tripping hazards can be created with **Ramplox®**.

Prevent unnecessary spills while placing **E-Contain® Spillguards** under your equipment.

The **Spillguard Hose Bridge** protects the spill containment berm and supports pipe and hose connected to your equipment.
